Ruijie Zheng

210 Watkins Pond Blvd, Rockville, MD 20850
240-380-8200, rzheng12@umd.edu

EDUCATION

Bachelor of Science, Double Major in Computer Science & Mathematics Anticipated May 2022
University of Maryland, College Park, MD
Cumulative GPA: 4.0

Science and Global Change, College Park Scholars Program Anticipated May 2020

- Actively participate in three semesters worth of discussion classes which focus on guiding principles of scientific research as well as global climate change.
- Travel to Arizona during spring break to experience the diverse geology, zoology, botany, astronomy

SKILLS

- Programming Language: Python, Java, C, and MATLAB
- Machine Learning: Scikit-learn, Tensorflow, Keras, Gensim, NLTK.

RELEVANT PROJECTS

Using supervised learning and unsupervised learning algorithms to analyze and detect fake news
December 2019

- Visualizing the fake news dataset with various unsupervised learning algorithms, including topic modelling, doc2vec transformation, etc.
- Applying supervised learning algorithms such as k nearest neighbors, support vector machine, random forest, and neural network to classify the fake news

EXPERIENCE

Terrapin Leadership Institute, University of Maryland Fall 2018

- Completed a seven-week workshop series to develop leadership and teamwork skills
- Gained proficiency in key leadership skills including collaboration and ethical decision making
- Received a recommendation by leadership staff for engaged participation
- Created a product of learning to demonstrate key leadership skills learned and showcase written communication, critical thinking, and reflection skills

Robotics Service-Learning, **Science, Technology and Society Program** Fall 2019

- Design, deliver and evaluate robotics club as part of a 3-credit course that focuses on STEM education.
- Work as a group to design the lesson plan and material and lead the robotics club at Cesar Chavez Elementary School every week

Grading TA for STAT410 Introduction to Probability Theory Fall 2019

Awards

John D. Gannon Scholarship 2019-2020
Semester Academic Honors Fall 2018, Spring 2019, Fall 2019
2nd Prize in Chinese National Mathematics High School Competition Fall 2016

Related Coursework

- **CMSC132 Object Oriented Programming II**
  Introduces basic data structures, like linked lists, stacks, queues, trees, sets, and graphs, and implementation of those abstract data types using Java.
- **CMSC216 Introduction to Computer Systems**
  Conveys the fundamental concepts that enables programs to execute on real hardware, as well as how different programming constructs work at a lower level.
- **CMSC320 Introduction to Data Science**
  Introduction to the data science pipeline, including data management systems, exploratory and statistical data analysis, data mining and machine Learning Algorithms, as well as Data visualization.
- **MATH340 & 341 Multivariable Calculus, Linear Algebra, Differential Equations (Honors)**
  A one-year sequence that gives a unified and enriched treatment of multivariable calculus, linear algebra, and ordinary differential equation
- **MATH410 Advanced Calculus I**
  A rigorous analysis of functions of one variable
- **STAT410 Introduction to Probability Theor**y
  A rigorous introduction to probability theory
- **STAT420 Theory and Methods of Statistics**
  Covers some of the key ideas of mathematical statistics related to the good performance and optimality of statistical procedures (parameter estimates and hypothesis tests).
